Fixed patches
The fixed patches have fixed built-in presets. The keyswitches or cc#32 values apply across instruments. That means that e.g. a „bowed" of the vibraphone is on the same keyswitch as the „bowed" of the marimbaphone.

- Patch: **Tubular Bells.nki**

Keyswitch	cc#32 value	Preset
A0	0	standard mallets (cc#1 = 127: damped)
A#0	1	standard mallets
B0	2	soft mallets (cc#1 = 127: damped)

With each keyswitch you get some information about the current preset on the message line at the bottom of Kontakt.
If you want to know more about the standard scripting please download the „standard scripting documentation.pdf". The document can be found here:
